The idea of landscape runs through the work of Spanish photographer José Guerrero, who for years has been poetically approaching the creation of images that present us with spaces with a marked presence of tensions between aspects such as the rural and the urban, the document and abstraction, or photography and painting...

In his series, some dimensions or meanings that the landscape contains emerge, showing that it is not far away from us but that we can recognize in it denser layers of meanings, if we go beyond mere contemplation.

The cycle KBr Guests presents a conversation between artist and curator who, through the reading proposed by the exhibition, will talk about the work of José Guerrero, his genealogy and his place in the context of contemporary art.
